In a world that often values logic, reason, and conformity, right brained children can feel like outsiders. They may struggle in traditional educational settings, where their strengths are not always recognized or appreciated. But what if we could embrace the unique gifts of these children and help them flourish?

In her groundbreaking book, "Why Right Brained Children Should Be Left Alone," Dr. Sarah Jane Allen argues that right brained children have a unique way of seeing the world. They are often highly creative, intuitive, and empathetic. They may also be more prone to ADHD, dyslexia, and autism.

Dr. Allen believes that the key to unlocking the potential of right brained children is to leave them alone. This means giving them the space and freedom to explore their interests, develop their own ways of learning, and make mistakes.

In this article, we will explore the characteristics, challenges, and strategies for unlocking the full potential of right brained children.

Characteristics of Right Brained Children

Right brained children are often highly creative. They may love to draw, paint, write, or play music. They may also be very imaginative and have a vivid sense of fantasy.

Right brained children are often very intuitive. They may be able to sense the emotions of others and understand their needs. They may also be very good at reading body language and nonverbal cues.

Right brained children are often very empathetic. They may be deeply concerned about the welfare of others and may be very sensitive to injustice.

Right brained children may also be more prone to ADHD, dyslexia, and autism. These conditions can make it difficult for them to succeed in traditional educational settings.

Challenges of Right Brained Children

Right brained children may face a number of challenges in school. They may struggle with reading, writing, and math. They may also have difficulty paying attention and following instructions.

Right brained children may also be more likely to be bullied. They may be seen as different or strange by their peers.

It is important to understand that the challenges faced by right brained children are not due to any lack of intelligence. In fact, right brained children are often very intelligent. They simply learn differently than left brained children.

Strategies for Unlocking the Potential of Right Brained Children

There are a number of things that parents and educators can do to help unlock the potential of right brained children.

1. Give them space and freedom to explore. Right brained children need the space and freedom to explore their interests and develop their own ways of learning. This means giving them time to play, create, and experiment.

2. Encourage their creativity. Right brained children are often very creative. Encourage them to express their creativity through art, music, writing, or drama.

3. Help them develop their intuition. Right brained children are often very intuitive. Help them develop their intuition by encouraging them to pay attention to their feelings and gut instincts.
